INFORMED CONSENT FOR MYELOGRAM

You have the right to be informed about your condition and the recommended surgical, medical or diagnostic procedure to be used so that you may make the decision whether or not to undergo the procedure after knowing the risks and hazards involved. This disclosure is not meant to alarm you, but rather to inform you of your procedure so that you may choose to give or withhold your consent for the procedure.

If you are pregnant or think you may be pregnant, please inform the facility personnel at once.

Your physician has requested that we perform a myelogram to obtain additional information. This is an advanced diagnostic technique that involves x-ray images to provide detailed information of areas within your body to your physician. A local anesthesia (numbing agent) will be injected at the site. There will be a slight burning sensation when the local anesthetic agent is injected. This will pass quickly. As part of the myelogram, a contrast material (contrast medium) will be injected into the spinal canal in order to visualize the spinal cord and nerves. The contrast medium will absorb into your system within 4 to 6 hours.

Potential Risks – The following complications are possible: anytime an injection is given, there is potential for pain, bleeding, bruising or swelling at the injection site. Additional allergic reactions in response to the contrast agent may include hives, shortness of breath or difficulty in swallowing. You should be aware that there is a possibility of hemorrhage, infection, headache, tingling or burning in the legs, nerve damage, kidney damage, paralysis, slow heart beat, seizure, heart attack and cardiac arrest. There have been rare instances of death after the administration of the contrast agent. It is VERY important that you inform the technologist if you experience any of the conditions mentioned in this form.

If you have previously had a reaction to a contrast injection such as hives, severe itching, shortness of breath and/or any significant reaction requiring hospitalization, a history of asthma or other allergic conditions, any history of anemia, sickle cell anemia or kidney disorder, are pregnant or breast feeding, you **MUST** inform the technologist.

I CERTIFY THIS FORM HAS BEEN FULLY EXPLAINED TO ME, THAT I HAVE READ IT OR HAVE HAD IT READ TO ME, AND THAT I UNDERSTAND ITS CONTENTS.

I HAVE BEEN GIVEN AN OPPORTUNITY TO ASK QUESTIONS ABOUT MY CONDITION, ALTERNATIVE FORMS OF ANESTHESIA AND TREATMENT, THE PROCEDURES TO BE USED, AND THE RISKS AND HAZARDS INVOLVED, AND I BELIEVE THAT I HAVE SUFFICIENT INFORMATION TO GIVE THIS INFORMED CONSENT.

INFORMED CONSENT FOR CT SCAN WITHOR WITHOUT CONTRAST INJECTION

PATIENT NAME: _____

**IF YOU ARE PREGNANT OR THINK THAT YOU MAY BE PREGNANT,
PLEASE INFORM THE FACILITY PERSONNEL AT ONCE.**

Your physician has requested that we perform a computerized tomography scan (CT) to obtain additional information. This is a diagnostic test that uses x-ray and a computer to produce images of internal body parts.

As part of your examination, we may need to inject you with a contrast solution containing iodine. This clear, colorless liquid is removed from your body by your kidneys and will not alter the appearance of your urine. It will show up on the images to provide important diagnostic information.

Soon after the injection you may experience a metallic taste and a warm sensation. You may feel some nausea. These feelings last only a short time.

Occasionally, minor allergic reactions occur in the form of itching, sneezing, hives, swelling of the eyes or wheezing. These symptoms may require treatment with medication we have on hand. It is very important that you inform the technologist if you experience any of the conditions mentioned in this form.

Rarely, a more serious reaction will occur. Even though it is extremely rare, medical statistics indicate that a fatality may occur from the injection of contrast. If you have had a reaction to a contrast injection previously or a history of asthma or other allergic conditions, any history of diabetes or any kidney disorder, anemia or sickle cell anemia, if you are taking Glucophage, are pregnant or breast feeding, you **MUST** inform the technologist.

The benefit of this exam is to assist your physician with making a diagnosis. There may be other imaging alternatives, however, your physician believes the CT scan to be the best diagnostic test for you after evaluating your symptoms and medical condition.

By my signature below, I hereby certify that I have fully read this consent, had it explained to me or have had it read to me. I have been given an opportunity to ask questions about my condition, alternative forms of treatment, the procedures to be used, and the risks and hazards involved. I understand its contents and have sufficient information to give this informed consent.
